

PRAJAL DIXIT

React Native Engineer · Mobile Application Developer

Bhopal, India | vkdixit46@gmail.com | +91 79744-02079 | [linkedin.com/in/prajaldixit](https://www.linkedin.com/in/prajaldixit)

PROFESSIONAL SUMMARY

React Native Developer with 4 years of experience building scalable, cross-platform mobile applications across healthcare, e-commerce, and wellness domains using React Native, TypeScript, JavaScript, and Redux. Experienced in delivering production-grade features end-to-end from architecture and API integration to App Store and Play Store release while collaborating with cross-functional teams in Agile environments. Proven track record of improving app performance and reliability, including a 30% reduction in screen load time, stabilizing revenue-critical checkout flows, and resolving high-severity production incidents across live Android and iOS builds.

TECHNICAL SKILLS

Mobile: React Native, Mobile Development, iOS Development, Android Development, WebView Bridge Architecture, React Navigation, Deep Linking, React Native Reanimated, React Native Gesture Handler

Languages: TypeScript, JavaScript, React Native

State Management: Redux, Redux Toolkit, Context API

Engineering: Performance Profiling, Production Debugging, OTA Updates, CI/CD, Code Reviews

Integrations: REST APIs, Third-party SDKs, Feature Flags, CodePush

Tools: Git, Bitbucket, Jira, Xcode, Android Studio, React DevTools, Flipper, VS Code, Metro Bundler

Methodologies: Agile, Scrum, Sprint Planning, Cross-functional Collaboration

Domains: Healthcare, E-commerce, Wellness, EdTech

EXPERIENCE

MFine — React Native Developer

Nov 2025 – Present

Bangalore, India · Healthcare SaaS · Production Mobile App

- Built the Cult.fit membership integration end-to-end city selection, plan discovery, and live API-driven plan screens launching a brand-new fitness-membership revenue stream directly inside the MFine app and expanding what the platform offers its users.
- Owned and stabilized the hybrid medicine-ordering and MDP checkout flow, which handles real transactions for thousands of users daily hunting down and fixing multiple cart, edit, and cross-platform bugs that were silently breaking purchases in a revenue-critical journey.
- Improved payment reliability across the app by fixing TPA cancellation failures, resolving a Scan & Pay re-upload defect that blocked expense claims, and introducing UTR-based payment reference tracking so finance teams could reconcile transactions without manual follow-up.
- Strengthened corporate onboarding and login reliability shipped email verification for corporate sign-ups, fixed Android-specific login case-handling bugs, and resolved corporate profile and email-validation issues that were causing silent drop-offs during authentication.
- Resolved a cluster of cross-platform UI and stability issues including production screen flicker, wallet display glitches, iOS map rendering failures, OTP layout breaks, and video call instability delivering a noticeably smoother experience across both Android and iOS.
- Shipped Aadhaar upload flows with cancel CTAs for better user control and rolled out Smart Reports and an in-app chatbot behind feature flags enabling safe, controlled releases to targeted user segments before full launch.
- Rebuilt the lab-test booking flow by identifying and removing hidden performance bottlenecks, cutting screen load time by ~30% and making the booking experience noticeably faster for patients on both platforms.
- Managed over-the-air (OTA) updates and App Store / Play Store release cycles enabling the team to push critical fixes to users instantly without waiting for store approval.

5D Solutions — React Native Developer

Jul 2025 – Oct 2025

Pune, India · EdTech · HomeEducation App

- Profiled and optimised end-to-end app performance for HomeEducation a student-facing platform centralizing schedules, exam tracking, and school updates instrumenting latency hotspots, reducing render time, and implementing API response caching to deliver noticeably faster load speeds across both Android and iOS.
- Improved app accessibility and internationalization readiness by enhancing contrast ratios and text readability for visually diverse users and laying groundwork for multi-language and RTL support preparing the app for expansion beyond its initial market.

Deqode — Solution Engineer

Oct 2024 – Jun 2025

Indore, India · E-commerce Mobile App · Nerovega

- Built a full shopping app (Nerovega) from scratch set up the project architecture, designed how screens connect and data flows, integrated all backend APIs, and shipped it to both the App Store and Play Store as a production-ready release.
- Solved the most common pain point in product-heavy apps slow, janky browsing by overhauling how product listings load and render, so users scrolling through large catalogues get a fast, smooth experience without dropped frames or delayed images.
- Unlocked international markets by adding right-to-left language support and multi-language configuration, allowing the app to serve new geographies without rebuilding any existing screens or flows.

iLEAD Group — Software Developer

Aug 2022 – Sep 2024

Indore, India · Multiple Production Applications

- Built UEP Viewer from the ground up designed the app's data architecture and screen component library in a way that made adding new features fast without destabilising what was already live and working.
- Owned every step of the Android and iOS release process across multiple apps signing certificates, provisioning profiles, store submissions, and compliance reviews so launches went out on schedule without last-minute blockers.
- Built real-time security workflows for ZipSecure and doctor consultation flows for Ananda Wellbeing, live data synchronization, async operations, and native device interactions that don't behave the same across platforms.

EDUCATION

Bachelor of Technology — Information Technology

2018 – 2022

Shri Vaishnav Vidyapeeth Vishwavidyalaya, Indore, India

ACHIEVEMENTS

- Employee of the Month — January & March 2024 (iLEAD Group)
